

WHAT'S THE SHELF LIFE OF YOUR CURRENT FLOOR?

Take a look around your store. How long did your current floor really last? And by last we mean, look and perform like it did the day it was installed—a year or two, maybe five? Now ask yourself, how long should it have lasted? At AcryliCon, we think a floor should last for 10, 20, or even 30 years. That's right, up to three decades without waxing, striping or re-polishing. And we have the floors to prove it.

AN INSTALLATION PROCESS THAT KEEPS SHOPPERS, SHOPPING.

We know installation time is right up there with cost per square foot. Which is why, every AcryliCon flooring solution is designed to cure faster than virtually any other competitive flooring product on the market—whether you choose Lacquer, Décor or Flake.

- Industry leading, two-hour mechanical cure time
- Ultrahygienic, non-porous surface for life of the floor
- Absolutely no VOCs
- Slip coefficients compliant with ADA and OSHA
- Lower maintenance costs than any competitive products
- The most active flooring references in the industry
